

EVERYTHING ASPHALT

Asphalt Products for Special Applications

Approximately 9% of US Asphalt is used for or in roofing and roofing products. You can find products which meet all your needs and specifications for superior roofing asphalts from Martin Asphalt. The company supplies Steep, Saturants and additional lines of products and product additives.

With about 90% of the rest of US asphalt supplies being used for paving purposes, the remaining one percent is used for a wide variety of applications that take advantage of asphalt's adhesive and waterproofing properties. Ancillary to the paving applications, the Company's Evergrip Pavement Marker Adhesive and pre-formed Evergrip 990 underground concrete pipe joint sealants are leaders in their industries.

Flooring professionals have used Martin's Everlock adhesives (marketed under the Gulf States Asphalt Company name) for wood and vinyl tile floors for more than 40 years. These products have both commercial and residential applications in this very select market segment.

Your need can be custom-blended and tested by Martin Asphalt Company's state-of-the-art, AASHTO Certified laboratory. Contact us for more information on both available and custom materials to meet your specific requirements.
